EXPENSE MANAGER

Abstract: One of the biggest problems faced by middle class people is keeping track of all their expenses and managing it. So, seeing this problem we have developed an easy to use "Expense Manager" app to keep track of all the expenses. All the user has to do is to fill the app whenever they do any transaction anywhere and the app will show all the transactions made. The app has an extra feature too. It shows a chart of amount spent in each weekday. Target audience for this app is people of age greater than 20.

Keywords:

   a)Middle class people
